Leading packaging expert for the postal and parcel industry

Ecommerce business is growing rapidly all over the world. Companies in the postal and parcel industry are faced with a dynamic volume growth of parcels, for both domestic and cross-border business. Also, there is an increased demand for faster deliveries. The sector is preparing for the future. In order to ensure reliable and accessible postal services today and tomorrow, leading players in the industry are focusing on logistical excellence and have defined a strong sustainability approach.

At LC Packaging we understand the dynamics and challenges in this industry as no other. We have a proven track record in providing leading European postal and parcel organisations with their need for high quality solutions and responsible sourcing. We support the industry in achieving high delivery performance and contribute to corporate social responsibility goals.

Benefit from our expertise in packaging for the postal and parcel industry!

keeps your industry going

Our leading packaging expertise for the post and parcel industry

Our packaging is an integral part of the postal and parcel sector. We support the industry in delivering mail pieces and parcels faster, more accurate and more sustainable.

Proven track-record in the postal and parcel industry

Achieve higher performance: increase efficiency, reduce cost

Own production facilities and exclusive dedicated production partners

Tailor-made packaging conforming to individual requirements

Leading in quality management

Sustainability in the postal and parcel chain

Proven track record in the postal and parcel industry

Innovative packaging expert since 1923

We have been leading the packaging industry with high quality and sustainable packaging solutions since 1923. LC's portfolio includes woven PP bags, jute bags, cardboard boxes, FIBCs and more... Our solid growth allows us to continuously invest in our products, processes and partnerships with employees, production partners and customers. We have a strong innovation focus: we work with top-class systems such as SAP ERP, we offer 24/7/365 online call-off, and can setup an EDI connection with our customers.

We are working together with large postal companies in various European countries and provide them in their needs for high quality and sustainable packaging. We are committed to supporting the sector in offering accurate and on-time postal services.

Achieve higher performance

Increase operational efficiency and reduce cost

The popularity of our easy-to-use packaging for the postal and parcel industry is continuously growing. Our solutions are of excellent quality, offer great versatility and are the ideal solution for mail sorting and (airfreight) transportation. Our packaging is easy to handle to fit smart and agile operational processes, and to contribute to faster and more accurate deliveries of mail pieces and parcels.

Selecting the right packaging contributes to increased operational efficiency and helps companies to become more cost efficient: e.g. our woven polypropylene bags are suitable for multi-use purposes. With our packaging solutions, we support the sector for a more efficient supply chain.

Own production facilities and exclusive dedicated production partners

Solid and sustainable sourcing

With our own certified production facilities and long-term partnerships with exclusive and dedicated production partners, we have full control of our packaging production. This allows us to be flexible, and meet individual postal and parcel organisations' requirements. We can be sure the production is done according to our own high standards and with excellent control of quality.

At LC Packaging we value fair trade and long-lasting relationships with our suppliers: with some we have a partnership for decades! Our focus is finding partners who have the same corporate values as we do. Consequently, we and our customers know what is purchased, where the packaging for mail pieces and parcels originates from and how manufacturers really operate.

Tailor-made packaging conforming to your individual requirements

Broad range of products for the postal and parcel industry

We are the leading expert in designing, producing, testing and delivering the right packaging for the postal and parcel industry. We can produce every type of woven polypropylene bags, jute bags, cardboard boxes, and Flexible Intermediate Bulk Containers (FIBCs/bulk bags/big bags), according to our customers' needs. We have extensive expertise to make sure we deliver a packaging solution that exactly fits the specific processes and technical demands.

We always have a local packaging expert available to conduct an on-site technical evaluation to help individual postal organisations achieve an optimal level of operational and cost efficiency.

Leading in quality management

Assuring full compliance to regulatory requirements

Quality is much more than the strength of our packaging: it is the complete package. We are committed to delivering the postal and parcel industry the highest quality packaging and excellent service. Our dedicated quality department runs all aspects of quality of our products, our manufacturing processes and our working conditions. We comply with a comprehensive portfolio of quality management standards and regulations, for example: ISO 9001, ISO 14001 and BRC-S&D.

Sustainability in the postal and parcel industry

Packaging done right by taking our corporate social responsibility seriously

Postal operators worldwide are progressively focusing on taking corporate social responsibility initiatives and setting goals for example CO² emissions per mail service. LC Packaging supports these companies to meet their CSR strategy and goals and offer partnership for more sustainability throughout the entire chain.

LC Packaging takes CSR very seriously and we are continuously undertaking measurements to further strengthen our own sustainability policy:

- Advanced membership: we follow the UN principles on business and human rights

- Minimal impact on the environment by using fewer resources, less transportation, and a recondition & recycle programme (ISO 14001)

People

- Safe and healthy working environment for wellbeing of our employees, employee development and creating an environment for gender equality

Projects

- LC Supports Foundation contributes to improving the welfare and environment of countries where LC Packaging is directly or indirectly active, in the broadest sense of the word

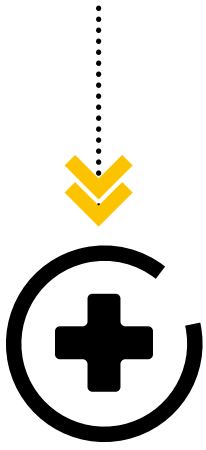

- LC Supplier Code of Conduct: our production partners are committed to the highest standards of social and environmental responsibility

- Awarded with a silver medal for our CSR initiatives through the unique EcoVadis CSR assessment methodology

Why LC

Committed - Reliable - Loyal

Always near

With our offices, own production and storage locations in 16 countries in Europe, Africa and Asia we offer international service with local support.

Leading since 1923

We are a proven solid and reliable business partner with a strong and healthy financial performance, combined with an inspiring family tradition.

Own production

With own production and dedicated production partners we offer tailor made solutions according to our own high quality standards.

Long-term partnership

Our company is about transparency and trust, and we focus on long-term, mutually beneficial partnerships with our employees, production partners and customers.

Best people

Our people are our greatest asset. Our experts understand your business, are committed to quality and are dedicated to offering the best solution.

Quality in packaging

With a dedicated in-house Quality Department we offer quality excellence and compliance with a comprehensive portfolio of required quality standards.

Innovative approach

We continuously invest in our infrastructure, systems and processes to meet and improve our customer experience for today and tomorrow.

Solid sustainability policy

We strive to include all stakeholders in our quest to provide sustainable packaging solutions, while minimising the impact on the environment, the waste of valuable products, while also enriching the communities in which we operate.
