

keeps your
industry going

Leading packaging expert in sustainable FIBC solutions

LC Packaging is a family business that has been active in the packaging industry for four generations. The company started serving the industry in 1923 and has expanded considerably over the years. Today we are a leading global company with own manufacturing locations in Europe, Asia and Africa, and have over 1,000 employees: we are a leading expert in FIBC solutions.

Committed

Reliable

Loyal

Leading specialist in FIBCs

Dear reader,

LC Packaging is a family business that has been active in the packaging industry for four generations. What started as a jute bag importer and trader in 1923, has evolved to a full service manufacturer and distributor and one of the largest packaging experts in the field of Flexible Intermediate Bulk Containers, also known as FIBCs, big bags and bulk bags.

LC Packaging has offices, warehouses and production locations in 16 countries in Europe, Asia and Africa, own certified production locations and dedicated production partners. This, combined with our global network and local service makes us always able to respond to your individual packaging needs, anytime and anywhere.

LC Packaging is committed to being your long-term partner in sustainable packaging solutions, for every product and every industry. From bags suited for construction, form stable and ventilated bags to food safe, pharma clean, UN and electro-static FIBCs: Our motto is to keep your industry going.

At LC Packaging we guarantee our customers consistent high quality solutions. Meaning much more than just the strength of our packaging and our comprehensive portfolio of certificates: It is the package as a whole.

It is in the quality materials we use and the state-of-the-art production process, the quality of transport and storage and in the service we provide, the working conditions in which our FIBCs are produced and sustainable practices when it comes to reducing our environmental footprint.

Thank you for your interest in our company. We are looking forward to a sustainable and successful partnership.

Yours faithfully,

Director Industrial Packaging

Marcel Schouten

Approach

Always near

We are the fastest growing FIBC supplier and with our offices, own production facilities and storage locations in 16 countries in Europe, Africa and Asia we offer international service with local support.

Leading since 1923

Experience our inspiring mixture of the tradition of a family business and the fast and flexible support of an energised and specialised organisation. We are a proven solid and reliable business partner, with a strong and healthy financial performance.

Innovative approach

We continuously invest in our infrastructure to meet and improve our customer experience. Our systems allow real-time insight in your inventory and annual usage, which can help you optimise your logistical planning.

Own production

With own production and dedicated production partners we have full control of the production of our extensive product portfolio. It allows us to be flexible and offer tailor-made solutions according to our own high standards and personal quality control.

Quality in Packaging

With a dedicated quality department we offer quality excellence and compliance with a comprehensive portfolio of required quality standards and focus on extended and improved standards throughout the chain.

Long-term partnership

Our company is about transparency and trust, and we focus on long-term, mutually beneficial partnerships with our employees, our production partners and our customers.

Best people

Our people are all over the world, and we consider them our greatest asset. Our experts fully understand the importance of your business, are committed to quality and are dedicated to offering you the best solution.

Solid sustainability policy

We take our responsibility for more sustainability throughout the entire chain seriously, and support you in achieving your sustainability goals and gain higher competitive advantage. We feel responsible for (our) people, we want to minimise our impact on the environment and we reinvest almost all of our profit in our company for on-going development of our production locations and offices to ensure we can offer over 1,000 high quality local jobs.

WorldBag: refurbish and recycle

Save the bag, save the planet

LC Packaging's affiliate WorldBag collects used big bags from all over Europe, cleaning and repairing them, ready for reuse. The bags are then delivered to our customers in pristine condition. With this closed-loop formula, WorldBag offers a unique, efficient, sustainable 100% solution. Reconditioning your big bags ensures the right balance between a long life span and low costs.

Advantages of our WorldBag service:

- Lower packaging offers savings up to 40%
- Less packaging waste means savings for your costumers
- Reduced environmental impact
- ISO 14001 certified
- Complies with EU directive 94/62/EG
- Registered with NIWO and VIBH

Our broad range of FIBCs

Food safe & Pharma clean

LC Packaging's food safe and pharma clean FIBCs include our innovative Food Safe and Pharma Clean Program for cleaner, safer and sustainable premium packaging for food and pharmaceutical ingredients and products.

Electro-static Type C

Our electro-static Type C FIBCs are specially designed for electro-static applications and meet the requirements of IEC 61340-4-4 norm. Type C FIBCs offer safety during the filling and discharging in flammable gas, vapor or dust atmospheres.

Electro-static Type D

Next to Type C, we also design, test, produce and deliver electro-static FIBCs Type D. Based on the ATEX Dust zones 20-22 and the MIE level of the product we can determine which FIBC classification meets your requirements.

Q bags (formstable)

Our Q bags are form-stable FIBCs fitted with an internal baffle structure. Baffles ensure the Q bag stays within the pallet dimensions and guarantees an optimum load for any type of transport.

Reconditioned FIBCs

Collecting - Reconditioning -
Replacing - Returning

With our WordBag closed loop formula we collect the bags for you, and clean, inspect and make the bags ready for reuse. Suitable for FIBCs with a safety factor of 6:1 and 8:1

1-2 point lift FIBCs

Perfect for relatively low packaging weights of 500 to 1000 kg and in situations where filling speed is crucial. Our 1-2 point lift big bags are mostly used on semi-automatic or fully automatic filling lines.

The industries we serve

UN FIBCs

UN FIBCs are certified for the transportation of hazardous goods under ADR regulations. Our UN bags are tested and designed to comply with all the requirements of a UN FIBC.

Ventilated big bags

Our ventilated bags are breathable and very strong for improved product preservation. Ideal for potatoes, carrots, onions, cacao beans, woodlog, nuts, etc.

FIBC liners

Liners provide additional protection against air and water vapour migration and the effect of light. Liners are available in LDPE, LLDPE, MDPE and HDPE.

More

We design, produce, and test every type of FIBC to make sure we deliver a packaging solution that fully meets your individual processes and technical specification demands.

Our FIBC experts are available to conduct on-site technical evaluation to help you find the right FIBC and achieve an optimal level of operational and cost efficiency.
