Innovative FIBC programme for premium food safe packaging

The biggest challenge for the food and food ingredients industry is gaining and maintaining consumers trust in food safety. Food companies need to avoid any risk of distrust throughout the entire supply chain, as food safety crisis situations/outbreaks can be considered one of the largest threats for companies and even for entire industries.

LC Packaging is the international leading expert in FIBCs. We have a proven track record of working together with global companies on the food safety of their products.

keeps your industry going

Our leading expertise
in the food industry

Food Safe Assurance Programme

We understand your food safety challenges. With our **Food Safe Assurance Programme**, we offer the food industry the cleanest and safest FIBCs that meet the highest industry standards. Only if the packaging includes all elements of our 'Food Safe Assurance Programme', does it meet the standard of what we believe should be the standard for all food safe packaging.

Leading in quality management

Assuring full compliancy to food safety

Quality is much more than the strength of our packaging: it is the complete package. We are committed to delivering the highest quality food safe packaging and excellent service. Our dedicated quality department runs all aspects of quality of our FIBCs, our manufacturing processes and our working conditions. We comply with a comprehensive portfolio of required food safety standards and regulations, for example: BRC, FSSC 22000, ISO 22000, (EU) No. 10/2011.

Consultancy for global food safety

Our safety code, your consumer's trust

Our expert guidance contributes to higher consumer confidence in food safety. We lead the industry by helping food companies understand and meet the standards for clean packaging. We create and accelerate awareness of packaging cleanliness in the European food (ingredients) industry through the circulation of our Food Safety Code: guidelines we developed in cooperation with a global leader in the food industry, which describes how to safeguard food safety by respecting the specifics of the FIBC during use.

State-of-the-art manufacturing technology

Advancing food safety through innovation

Our factories are accredited with all food safety certificates and have state-of-the-art clean room facilities. We are continuously innovating our manufacturing to meet the highest food safety standards available in the market. Our ultimate goal: **“Eliminate the Last Particle”** by using advanced technologies such as:

- Full migration testing of all materials used
- More effective cleaning with highly innovative processes:
 - Inside view technology during air washing
 - Vacuum outside cleaning technology
 - Ultrasonic spout hemming technology
- Class 10.000 liner extrusion
- Overpressure complete clean room
- 100% metal detection

Innovative product design

Leading the way in food safety and quality with material innovation

The increasing demand for food packaging, constantly drives LC Packaging to search for new material combinations. We focus on creating high added value in our packaging solutions: with our excellent packaging barrier liners we protect your products better, help to slow down the food degradation process and contribute to an increased shelf life:

- Premium material quality manufactured under clean room conditions and benchmark barrier properties
- Food safe conductive aluminium liners
- Premium liner structures such as PE / PA / PE, L1, L2 as well as Aluminium
- Innovative EVOH barrier liner

Cost and operational efficiency

Achieve more: total cost reduction & load securing

In addition to food safety, we help companies improve their total cost structure and operational efficiency when using FIBCs. Through our latest developments in the in-house manufacturing of form stable FIBCs (Q-bags), our customers benefit from:

- Cordnet technology for more safety for your employees in storage and ware housing
- Cordnet baffles for higher Q bag/Q liner stability and excellent product flow during bag filling
- Highly stable FIBCs which help to secure the load and protecting your products
- Optimised load space, which helps to reduce transportation costs and limits CO² emission per bag
- Gambo protective packaging against outside contamination and moisture

Sustainability throughout the chain

Packaging done right by taking our responsibility

LC Packaging engages in a partnership with our own employees, production partners and customers and takes responsibility for people and planet.

We maintain a solid corporate sustainability policy with:

- Advanced membership with the UN Global Compact: we follow the UN principles on business and human rights
- Safe and healthy working environment to ensure the wellbeing of our employees (OHSAS 18001, SA8000)
- Supplier Code of Conduct proofs shared values with our production partners
- Minimal impact on the environment by using fewer resources, less transportation, and a recondition & recycle programme (ISO 14001)
- Reinvestment of profit in our company for ongoing development of our production locations and to create high-quality local jobs
- Member of EcoVadis

Our advantages

Always near

We are the fastest growing FIBC supplier and with our offices, own production facilities and storage locations in 16 countries in Europe, Africa and Asia we offer international service with local support.

Leading since 1923

Experience our inspiring mixture of the tradition of a family business and the fast and flexible support of an energised and specialised organisation. We are a proven solid and reliable business partner, with a strong and healthy financial performance.

Own production

With own production and dedicated production partners we have full control of the production of our extensive product portfolio. It allows us to be flexible and offer tailor made solutions according to our own high standards and personal quality control.

Innovative approach

We continuously invest in our infrastructure to meet and improve our customer experience. Our systems allow real-time insight in your inventory and annual usage, which can help you optimise your logistical planning.

Long-term partnership

Our company is about transparency and trust, and we focus on long-term, mutually beneficial partnerships with our employees, our production partners and our customers.

Best people

Our people are all over the world, and we consider them our greatest asset. Our experts fully understand the importance of your business, are committed to quality and are dedicated to offering you the best solution.

Solid sustainability policy

We take our responsibility for more sustainability throughout the entire chain seriously, and support you in achieving your sustainability goals and gain higher competitive advantage. We feel responsible for (our) people, we want to minimise our impact on the environment and we reinvest almost all of our profit in our company for ongoing development of our production locations and offices to ensure we can offer over 1,000 high quality local jobs.

Quality in packaging

With a dedicated Quality Department we offer quality excellence and compliance with a comprehensive portfolio of required quality standards and focus on extended and improved standards throughout the chain.
